

# Maths Focus:

Have fun practising our counting, this is a great way to help with counting up to 10, lots of different ideas for collecting things, (sticks, stones, flowers, toys, shiny things, different shapes, the same shapes, use recycling resources). There are also endless opportunities for discussion:

- Take away how many left?
- How many more do you need to find?
- Can you remember where you found it? Can you put them away in the right place?
- Which one is the biggest, longest, smallest, heaviest?

USE the link below to complete some numeracy based activities:

<http://www.topmarks.co.uk>

Browse subject 'Maths' and age\_group 'Early Years'

Try shape patterns or some of the counting and number recognition activities like 'Teddy Numbers' or 'Underwater Counting'

*Lots of opportunities for counting up to 10.*

*Find 10 things, colour, shape, texture, size*

*Take away how many left?*

**Ten Square**

*Make 10 square sheets, out of card paper, old cloth*

*Opportunities for conversation, describing, comparing, remembering where they found them.*
